Release Notes – Firmware Security Patch v1.1

Introduction
This document applies to the security patch created for:
- FLIR PT-Series-HD and PT-602CZ-HD

Release Notes
This Firmware Patch applies some modifications to address the following five cybersecurity issues:
1.- Information disclosure: Some internal files could be accessed without authentication.
2.- Stream disclosure: Video snapshot URL did not require authentication.
3.- Unauthenticated remote code execution.
4.- Authenticated remote code execution.
5.- Remote access hard-coded credentials: SSH security has been improved.
