8.1 FCC Class A Notice .................................................................................................................. 20
1 Important Safeguards

In addition to the careful attention devoted to quality standards in the manufacturing process of your product, safety is a major factor in the design of every instrument. However, safety is your responsibility too. This sheet lists important information that will help to ensure your enjoyment and proper use of the product and accessory equipment. Please read them carefully before operating and using your product.

1.1 General Precautions

1. All warnings and instructions in this manual should be followed.
2. Remove the plug from the outlet before cleaning. Do not use liquid aerosol detergents. Use a water-dampened cloth for cleaning.
3. Do not use this product in humid or wet places.
4. Keep enough space around the product for ventilation. Slots and openings in the storage cabinet should not be blocked.
5. It is highly recommended to connect the product to a surge protector to protect from damage caused by electrical surges. It is also recommended to connect the product to an uninterruptible power supply (UPS), which has an internal battery that will keep the product running in the event of a power outage.

CAUTION

Maintain electrical safety. Power line operated equipment or accessories connected to this product should bear the UL listing mark or CSA certification mark on the accessory itself and should not be modified so as to defeat the safety features. This will help avoid any potential hazard from electrical shock or fire. If in doubt, contact qualified service personnel.

1.2 Installation

1. Read and Follow Instructions - All the safety and operating instructions should be read before the product is operated. Follow all operating instructions.
2. Retain Instructions - The safety and operating instructions should be retained for future reference.
3. Heed Warnings - Comply with all warnings on the product and in the operating instructions.
4. Polarization - Do not defeat the safety purpose of the polarized or grounding-type plug.

A polarized plug has two blades with one wider than the other.
A grounding type plug has two blades and a third grounding prong.

The wide blade or the third prong are provided for your safety.

If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

5. **Power Sources** - This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your location, consult your video dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

6. **Overloading** - Do not overload wall outlets or extension cords as this can result in the risk of fire or electric shock. Overloaded AC outlets, extension cords, frayed power cords, damaged or cracked wire insulation, and broken plugs are dangerous. They may result in a shock or fire hazard. Periodically examine the cord, and if its appearance indicates damage or deteriorated insulation, have it replaced by your service technician.

7. **Power-Cord Protection** - Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

8. **Surge Protectors** - It is highly recommended that the product be connected to a surge protector. Doing so will protect the product from damage caused by power surges. Surge protectors should bear the UL listing mark or CSA certification mark.

9. **Uninterruptible Power Supplies (UPS)** - Because this product is designed for continuous, 24/7 operation, it is recommended that you connect the product to an uninterruptible power supply. An uninterruptible power supply has an internal battery that will keep the product running in the event of a power outage. Uninterruptible power supplies should bear the UL listing mark or CSA certification mark.

10. **Ventilation** - Slots and openings in the case are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided and the product manufacturer's instructions have been followed.

11. **Attachments** - Do not use attachments unless recommended by the product manufacturer as they may cause a hazard.

12. **Water and Moisture** - Do not use this product near water — for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement, near a swimming pool and the like.

13. **Heat** - The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.
14. **Accessories** - Do not place this product on an unstable cart, stand, tripod, or table. The product may fall, causing serious damage to the product. Use this product only with a cart, stand, tripod, bracket, or table recommended by the manufacturer or sold with the product. Any mounting of the product should follow the manufacturer’s instructions and use a mounting accessory recommended by the manufacturer.

15. **Camera Extension Cables** – Check the rating of your extension cable(s) to verify compliance with your local authority regulations prior to installation.

16. **Mounting** - The cameras provided with this system should be mounted only as instructed in this guide or the instructions that came with your cameras, using the provided mounting brackets.

17. **Camera Installation** - Cameras are not intended for submersion in water. Not all cameras can be installed outdoors. Check your camera environmental rating to confirm if they can be installed outdoors.

### 1.3 Service

1. **Servicing** - Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

2. **Conditions Requiring Service** - Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   - When the power supply cord or plug is damaged.
   - If liquid has been spilled or objects have fallen into the product.
   - If the product has been exposed to rain or water.
   - If the product has been dropped or the cabinet has been damaged
   - If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
   - When the product exhibits a distinct change in performance. This indicates a need for service.

3. **Replacement Parts** - When replacement parts are required, have the service technician verify that the replacements used have the same safety characteristics as the original parts. Use of replacements specified by the product manufacturer can prevent fire, electric shock, or other hazards.

4. **Safety Check** - Upon completion of any service or repairs to this product, ask the service technician to perform safety checks recommended by the manufacturer to determine that the product is in safe operating condition.

### 1.4 Use

1. **Cleaning** - Unplug the product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

2. **Product and Cart Combination** - When product is installed on a cart, product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
3. **Object and Liquid Entry** - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or “short-out” parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

4. **Lightning** - For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power line surges.
2 FLIR UVMS Keyboard Features

- Manage FLIR UVMS (Latitude, Horizon and Meridian).
- Access multiple devices using the same keyboard.
- RS232 supported.

**Note**
3 Getting Started

The System comes with the following components:

- FLIR UVMS Keyboard
- 12V Power Adapter
- 1.5 meter RS-232 cable
4 FLIR UVMS Keyboard Overview

The keyboard has the following user account by default:
admin: can access all functions. Default password is 000000.

4.1 Default Username and Password
The keyboard has the following user account by default:

admin: can access all functions. Default password is 000000.

4.2 Keyboard Ports

1. **USB**: Not supported.
2. **RS422**: Not supported.
3. **RS485**: Not supported.
4. **Ethernet**: Not supported.
5. **RS232**: Used for RS232 connections
6. **DC12V**: Connect the power adapter to power the keyboard.

4.3 Front Panel & Buttons

Note: The SHIFT button works as a toggle button for other buttons on the keyboard. When SHIFT is used to trigger a function, it remains in the SHIFT state until the button is used again to toggle back to the previous mode.

5 Basic Setup

5.1 Start Up

1. Connect the included power adapter to the keyboard and to a power outlet or surge protector.
2. When the keyboard starts up it will show the current date and time on the display. Press ID to enter the sign in screen.

```
2014-11-17
03:16:17 PM
```

3. Move the joystick down to highlight PW. Enter the admin password (default: 000000). Press ENTER to log into the keyboard.

```
User: admin
PW:
```

4. Request to enter ID will be shown. Default ID '0' will be shows. Press ENTER to complete login.

5.2 Connecting to a client machine using RS232

You can use the User guide to control the UVMS United Control Center via an RS232 serial connection.

Note
To find the RS232 connection information in the UVMS, Finding RS232 Connection Information in UVMS United Control Center

1. Connect the RS232 cable from the keyboard to the back of the client PC.
2. Plug in the keyboard to power it on.
3. Press ID to open the menu. Select the admin user and enter the password (default: 000000) under PW.
4. Request to enter ID will be shown. Default ID '0' will be shows. Press ENTER to complete login.

The keyboard will connect to the device

5.3 Finding RS232 Information on UVMS

When connecting to the UVMS United Control Center, the address settings are pre-defined in the keyboard and does not require such configuration in the Control Center setting.

The following steps are required to allow the Control Center to recognize the keyboard:
Open Control Center on the client machine of which you plan to connect the FLIR Keyboard via RS232

1. At the top of the screen, on the application Menu, click Tools > Options

2. On the left hand side, navigate to Keyboard

3. In the Keyboard Selection section, open the drop-down and select: DVTel Keyboard v0.1

4. In the RS232 Port Selection section, open the drop-down and select the appropriate computer port associated with the RS232 port of the local client machine
5. Click **OK**
6  Keyboard Menu

You can use the keyboard menu to configure the keyboard.

6.1  Navigating the Menu
- Move the joystick UP and DOWN to select items.
- Move the joystick LEFT and RIGHT to change parameters.
- Press the keyboard buttons to enter characters. Press SHIFT to change input types. Press FOCUS to delete characters.
- Press ENTER to confirm selections or enter sub-menus.
- Press ESC to exit or go back.

6.2  System
The System menus allow you to configure keyboard settings. System menus are under Menu Settings>System.

6.2.1 Time
The Time menu lets you set the system time. Set the year, month, day, minute, and second. You can select 12 or 24 hour time under Mode. Press ENTER to save changes.

6.2.2 AUX
The AUX menu allows you to configure backlight and auto-logout.

- **Backlight**: Select ON to enable screen backlight or OFF to disable. Press ENTER to save changes.
- **AutoLogout**: Select OFF to disable auto-logout, or select auto-logout in 10 minutes (10M), 30 minutes (30M), or 60 minutes (60M). Press ENTER to save changes.
6.3 Account

The Account menus allow you to add, delete, or modify user accounts and passwords on the keyboard.

Note: You must be logged into the keyboard with the admin account to access this menu.

6.3.1 Modify PW

Modify PW allows you to change the password for a user account.

To change an account password:
1. Highlight User and press left/right on the joystick to select the user account.
2. Highlight PW and enter the new password for the user. It is recommended to enter a six digit password.
3. Highlight OK and confirm the password. Press ENTER to save the new password.

6.3.2 Add User

You can add additional user accounts to the keyboard.

To add additional user accounts:
1. Highlight User and enter user name.
2. Highlight PW and enter account password. It is recommended to enter a six digit password.
3. Highlight OK and confirm the password.
4. Press down to highlight Right and press ENTER to configure user account rights. Press LEFT/RIGHT to enable/disable rights. Rights are enabled when the icon is filled (•) and disabled when the icon is empty (?). Press ENTER to confirm the rights and save the user account.
5. Press ENTER to save the user account.
6.3.3 Delete User
Select a user account and press ENTER to delete the account.

Note: The admin account cannot be deleted

6.3.4 Modify Rights
Modify Rights allows you to change rights assigned to user accounts you have created.

To modify rights:
1. Highlight User and select the user account you want to modify.
2. Press down to highlight Right and press ENTER to configure user account rights. Press left/right to enable/disable rights. Rights are enabled when the icon is filled (•) and disabled when the icon is empty (?). Press ENTER to confirm the rights and save the user account.
3. Press ENTER to save changes.

6.4 Config (Resetting to Factory Defaults)
The Config menu allows you to clear all zones or reset the keyboard to factory default settings.

To clear zones:
1. Select Clear Zones and press ENTER.
2. Press ENTER again to confirm or ESC to cancel

To reset the keyboard to factory defaults:
1. Select Default and press ENTER.
2. Press ENTER again to confirm or ESC to cancel.
6.5 Info
The Version menu shows the current version of the keyboard firmware.

As our products are subject to continuous improvement, FLIR Systems, Inc. and its subsidiaries reserve the right to modify product design, specifications, and prices without notice and without incurring any obligation. E&OE
8 Notices

This equipment has been certified and found to comply with the limits regulated by FCC, EMC, and LVD. Therefore, it is designated to provide reasonable protection against interference and will not cause interference with other appliance usage.

However, it is imperative that the user follows the guidelines in this manual to avoid improper usage which may result in damage to the unit, electrical shock and fire hazard injury.

In order to improve the feature functions and quality of this product, the specifications are subject to change without notice from time to time.

8.1 FCC Class A Notice

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer’s instruction manual, may cause harmful interference with radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case you will be required to correct the interference at your own expense.
