FLIR Ranger® HDC MS increases mission effectiveness, extending surveillance through darkness, distance, and especially when “bad weather is good smuggling weather.” This multisensor system integrates long-range, mid-wave thermal imaging with a variety of powerful daylight sensors, and optionally a laser range finder, GPS, digital magnetic compass, and automatic video tracker. Read ship names or license plates, or watch the scene from a safe standoff distance of up to and beyond the 15 km range.

Integrated fog and heat turbulence filters penetrate particulates and eliminate image distortion caused by atmospheric conditions. Pan-tilt 1280x720 HD MWIR and visible cameras with powerful continuous-zoom telescopes help detect and identify more targets from farther away. Ranger HDC MS assesses threats while discerning between nuisance alarms and those requiring interdiction for border, coastal surveillance, and force protection surveillance. Besides increasing the mission effectiveness in bad weather, it also helps forces act faster, increase uptime, and reduce cyber risks.

### FEATURES
- **SEE MORE IN WIDE FORMAT**
  HD imagery captures twice as much of a scene compared to legacy standard resolution.
- **EXTEND MISSION CAPABILITY IN BAD WEATHER**
  See through fog and haze with the integrated fog filter, and through turbulent air with Merlin ASX turbulence filter.
- **ACT FASTER WITH HIGHER RESOLUTION IMAGERY**
  Shorten the time between target detection and counter measures with more comprehensive intel from HD details and a fast, accurate pan-tilt that’s perfect for slew-to-cue applications.
- **INCREASE UPTIME AND REDUCE COSTS**
  New long-life core doubles uptime and significantly reduces the downtime, maintenance, and logistic costs compared to previous generations.
- **REDUCE CYBER RISK**
  A cyber security tool provides high resistance to hacker attacks that can compromise mission effectiveness.

### APPLICATIONS
- BORDER SECURITY
- COASTAL SURVEILLANCE
- FORCE PROTECTION
- INDUSTRIAL FACILITY
- CRITICAL INFRASTRUCTURE SECURITY
- AIR & SEA PORTS
- VEHICLE & MAN-PORTABLE CAPABILITIES
