

# FLIR *BRICKSTREAM*<sup>®</sup> 3D Gen 2 Recessed Mount

X-tilt

The **BPC-2500-RCMT** is a two-piece plastic mount intended for recess mounting Brickstream 3D Gen 2 sensors into ceilings with an unexposed open void. The BPC-2500-RCMT can be used when X-axis tilt is required. The 3D Gen 2 sensor is inserted into the mount and secured using one 1/4"-20 bolt or 1/2"-20 bolt, and washers (included). The BPC-2500-RCMT mount grips the unexposed portion of the ceiling panel with three swiveling clamps and the tilt angle is controlled by adjusting an embedded Phillips screw. Angle markings are laser engraved in 5° increments for accurate tilt control.
