

UNIVERSAL SYSTEM SOLUTIONS

The FLIR Advantage

SAVE TIME

Our preconfigured, initialized, plug-and-play ready USS products will save you valuable time. We have configurations to meet all of your needs and ensure consistency across all of your sites, regardless of location.

OPTIMIZE SYSTEM PERFORMANCE

FLIR USS products are optimized for performance by experts in servers, storage, network, infrastructure, and VMS.

High Density & Power Efficient

- Maximize your rack space and cost
- Products are environmentally-friendly
- Long-term operating and power savings

Robust & Resilient:

- Protects from environmental and infrastructure failures with network and power-fault tolerance
- Enterprise-grade components provide peace of mind

RECEIVE GLOBAL SUPPORT

We are your single source for an end-to-end, worry-free solution. Our global support ensures timely replacement of hardware, including on-site service for FLIR servers, if required.*

SCALE FOR FUTURE GROWTH

Our USS products are scalable to meet your future growth needs and can be expanded at any time. The solution can accommodate up to 500 cameras and 96TB internal storage per server.

SAVE MONEY

FLIR USS products offer high-performance and reliable support at competitive prices.

* Excludes USS EDGE APPLIANCE

What is FLIR USS?

FLIR Universal System Solutions (USS) provide you with value-added, cost-effective advantages of purchasing preconfigured technology, including servers, storage, workstations, monitors, and more.

The FLIR USS technology allows you to avoid the risks associated with purchasing unreliable products from multiple sources, additional service support costs, Cost and support issues when scaling or expanding your system, and the lack of optimal system performance when purchasing COTS products outside of FLIR.

Our USS Offerings

1. USS SMB ELITE:

- Compact and efficient, with high performance for small to mid-sized businesses

2. USS EDGE APPLIANCE

- Compact, enterprise-grade solution ideal for mobile security deployments

3. USS ENTERPRISE

- Maximum reliability and speed, optimized to run Latitude UVMS

4. USS PREMIUM 2U

- Multipurpose rack server with excellent internal storage, redundancy and value for all types of video surveillance

5. USS Client Workstation:

- Efficient performance for basic to advanced security operation centers. Optimized for FLIR suite of VMS products
