

United VMS Version 6.4 End of Life Notice

March 31st, 2020

United VMS V6.4 was first released in Q1 2015 and has been expanded since then with Service Packs and Software Updates.

The FLIR software lifecycle policy includes 3 years of support and an additional 2 years of Expansion-Only, for a total lifetime of 5 years. Since the 5-year life cycle period has expired, FLIR announces the end of life of United VMS version 6.4 products.

The 6.4 versions were followed by releases of United VMS versions 7.0 and 8.0, and soon to be announced the release of version 9.0. Each United VMS release introduces new and exciting features, improved performance, and enhanced integration with other systems and edge devices.

All users of version 6.4 are advised to upgrade to a newer version of United VMS. Upgrades are available for free to customers with a valid SSA. Customers are encouraged to purchase SSA that will include both the upgrade as well as on-going technical support for a newer version.

FLIR will offer and sell new base licenses exclusively for United VMS versions 8.0 or later.

FLIR will be releasing new fixes and other software modifications exclusively for United VMS versions 8.0 or later.

Versions Reaching End of Life:

- Latitude 6.4.x releases, including plug-in packs, hot fixes, and any other additions or modifications.
- Horizon 6.4.x releases, including plug-in packs, hot fixes, and any other additions or modifications.
- Meridian 6.4.x releases, including plug-in packs, hot fixes, and any other additions or modifications.

Effective Date:

Immediately.
