Triton™ FH-Series ID
Multispectral Fixed Camera for Perimeter Security

The FLIR Triton FH-Series ID are ruggedized, multispectral fixed cameras that integrate industry-leading thermal imaging with 4K visible imaging to provide reliable intruder-detection capabilities for perimeter security. Built-in convolutional neural network (CNN) analytics accurately detect and classify human and vehicle threats moving at high or low speeds, minimizing false alarms and daily operations costs. Custom scheduling enables security operators to set intrusion analytics to run on visible streams during the day and on thermal streams throughout the night, establishing optimized coverage for any lighting condition.

ALWAYS READY, ALWAYS WORKING
Integrates high-resolution thermal imaging and a visible sensor into a single camera for optimal performance in any environment or lighting condition
- Gain 24/7 situational awareness in the most challenging perimeters with the 640 × 512 thermal imager and market-leading <30 mK thermal sensitivity
- Assess threats in real time and see forensic detail with the 4K visible camera
- Combines a two-camera installation in one physical connection for a cost-efficient solution
- 10-year thermal sensor warranty

HIGH-ACCURACY INTRUSION DETECTION
Features CNN-based decision support, allowing on-camera video analytics to run on both the visible and thermal spectrum for robust intrusion detection customized for each installation
- Minimize false alarms and the cost of daily operations by detecting and classifying threats (human and vehicle) with high accuracy
- Make detections based on time of day, business hours, and seasonality with the on-board scheduling tool, which allows the operator to select either visible or thermal analytics
- Clearly detect intruders in challenging poses – even when they’re only in partial view of the camera or moving at high or low speeds

EASY INTEGRATION
Deploy this camera as part of a Teledyne FLIR end-to-end solution or in combination with preferred third-party solutions
- Strengthen end-to-end systems with on-board NEXUS® technology, which enables network connections to FLIR edge devices
- Tightly integrated with FLIR United VMS and major third-party VMS
- ONVIF® Conformant to S/G/T profiles
